School Improvement Advisory Committee  
Red Oak Community School District

The following observations and questions were submitted at the end of our meeting in February. Responses to questions will be presented at our meeting next week. I look forward to seeing you there!

Observations	Questions
We were concerned about the results of the student voice grade results. Ex: When students don't have "heroes" or feel they may fail, they won't score well on tests.	Alternative school - how many students does this take in? Is their degree the same as a regular diploma? Would like more knowledge about this.
The growth of each student - proficiency vs. growth	College and Career Readiness - What are the standards used to measure this?
Achievement of students through scores compared to the state. The numbers were helpful.	How does Red Oak schools rate on a nationwide basis?
Need to come up with ideas to improve student to student respect.	Does changing teachers affect scores and discipline comparing elementary and secondary? Secondary has low scores and discipline.
School environment - Work hard at that Sharing the results Kids need to be happier and comfortable at the school.	Is there a way to get the kids more involved in seeing the data?
	Is there a way for more kids to have activities during the day/seminar (intramurals)?
	Is there a way to find out what students think teachers do well to build relationships?
	ACT - more information > 75% think college Few are taking it (< 25%) Information for parents How many times do they take it? Since when? Cost?
	Can we get new data when the new school report card comes out in March?
